## SKILLS

- ✓ Programming languages:- C++, Javascript
- ✓ Font-end development:- Html, CSS, React, Chakra UI,
- ✓ Back-end development:- NodeJs, Express, Mongoose, Mongodb

## PROJECTS

**ChatBuddy**

- ChatBuddy is a chat application enabling real time seamless one-on-one and group chats
- Technologies and frameworks involved: React, Chakra UI, ExpressJs, Mongodb, Mongoose, Socket.io.
- Features include real-time messaging, user authentication, group chats, responsive design.

**HashMarkt**

- HashMart is an e-commerce shopping website.
- Features of this application include listing product according to their categories, add product to the cart, together with captured product data.
- My role in this project was to develop the back-end of the application and integrate it with the front-end of the application

**Employee Management App**

- Created a web application that helps the HR team of an organization to manage the employees of the organization.
- The application has two types of users, the admin and the employee.
- The admin will have the ability to add, update and delete the employees details.
- The employee will have the ability to view his/her details and update his/her details.

## INTERNSHIPS
